

Amherst  
12 May, 1925

Dear W.D.: -

Glad to hear from you as always. We had a pleasant time with Mr. Sprague on his visit here. The name of the place where the V. whittifolia grew is Rattlesnake Gutter, Levere, and it is, as he may have told you, a very picturesque spot. There are many such about here, and the botanizing in them is now getting interesting. Last night at our Science Club, Dr. Albert J. Hies of Yale - a member of the M.B.L. - spoke interestingly on the ecology of the Pinelands Bar region. I may perhaps go down to Boston for the June club meeting, though I cannot yet be sure. I should like to have a chance to talk with Mr. J. about Md. plants, for I may ask me his Allenia before I should have to start. I wish you loved me our garden, in which a good many things are now coming into bloom, although we are probably a few days behind Cambridge. V. whittifolia is quite frequent in this part of the state; I also got V. sempervirens V. Boninensis in bloom; I had never seen it in flower before. Best regards Wall, As. P.  
I can recall, and was much charmed with it. When do you go to Stillburne?  
My mother mails for Randolph on Fridays of the week.

THIS SIDE OF CARD IS FOR ADDRESS

Mr. Walter Dine  
29 Brewster Street  
Cambridge  
Massachusetts

Pease, Arthur Stanley. 1925. "Pease, Arthur Stanley May 12, 1925 [Postcard]."
