

[ca. 1915-1916]

103 SOUTH STREET
NORTHAMPTON, MASS.

My Dear Mr. Deane -

The ferns have come from Dr. Deane, and are all I need, except the Asplenium Ruta-muraria - and I believe I had only two, or three at most, and those I sent to you and Dr. Fernald - I rather think that Mr. Rugg may send me that, for I know in that first collection there were a number of them - So if he can get

might be true or two more that you would like - I will not send the package back for two or three days anyhow - or no - I have just the specimen of Clusia insubilis var. obtusilobata - would you like that? I do not think they are very common - than the Cryptogramma stellata - not very common - quite the same. I should be glad to send you any or all of these - are the other duplicates are so common

time to look it up, I think
I shall keep it - It is not of
very great consequence, for
I can get them next summer -
or the Great Chickadee Hill,
and so my heart is light -
I have two large *Mytilus*
in this package, which I see
I have labelled *obliquus*, and
I confess I am a bit shaky
about it - for they are hard
to name - There are some
fine specimens of *B. Virginianus*,

I shall send you the little
limpet which I promised -
They were mounted by Mr.
Bourne, or some from
Japan - but mounted with
slips, so you will easily
unmount them - I find
a few good specimens of *Physa*.
Chamae *Brammii* and *Pillaea*
abrupta - I wonder
if you would care for
them - If so, let me know
and I'll send them - There

Wouldn't you like to
read Dr. Ferrald's Letter?
And will you kindly return
it, as you can I cannot
remember all he says.

What about the Supplement
part?

E. H. J.

Terry, Emily Hitchcock. 1854. "Terry, Emily Hitchcock undated [3rd item]."
