

Phil<sup>a</sup> March 6 1886

My dear Mr. Davenport

I send you by Express this afternoon, directed to you at 8 Hamilton Place - what I suppose to be the specimen of Pellaea cordata to which you allude. I don't like to risk it by mail with tickets & all.

I am glad to know that you are still at work on our favorite study.

As for me I have done no special fern work lately - our Academy's General Rept. - drawing on my time & strength for all that I can respond.

I have not seen Cheilanthes scariosa & should be glad to know it.

Yours very truly  
John H. Redfield
