

letter he said he was
"working constantly on my
Sphagnologia universalis".

When I get out of the
Infirmary I'll send you
specimens of the Ga. Sphagna.

With best regards,

H. H. Bartlett

10 Dec. 1907.

Dear Prof. Collins;

Since I was
not at the Club meeting
(on account of grip) I have
written a little synopsis
which I hope will help you
with the paper in the Oct.
Gazette.

I have received from Warnstorf
a report on my Ga. Sphagna.
There were two new species
among them, one, which he
has named S. Bartlettii, nearest
related to a Brazilian species
of the "Cymbifolia", the other,

address. I told him about your collections from Esapé, & surely must have said enough to get him excited. I said among other things that your specimens were in the highest degree "oceanic and reichlich gesammelt", a point upon which he seems to lay great stress. I made a mistake perhaps in saying that he was at work on Sphagnaceae for the Oplangeniaceae, for in his

which he has called S. validum, nearest to his S. mobilense from Alabama, a member of the "subsecundum group".

He wrote a very pleasant letter indeed, and I am sure he could not have received your letter of a year ago. The address given in the Naturalists' Directory is Neuruppin, but he now lives at Friedenan bei Berlin. You must have written to the wrong

Bartlett, Harley Harris. 1907. "Bartlett, Harley H. Dec. 10, 1907." *James Franklin Collins correspondence*
