

468 Hope Street, Providence,

January 16, 1908

Dear Bartlett:

After many moons I have had a chance to examine the New England mosses which you turned over to me some time ago. I have not had time to examine your Georgia specimens yet, and as my time for moss work is somewhat erratic I am going to report on this lot now.

J. F. C. H. H. B.
number number

15453	566	<i>Mnium cuspidatum</i> (L.) Leyss.
15454	758	<i>Polytrichum</i> [commune group]
15455	861	<i>Thelia hirtella</i> (Hedw.) Sulliv.
15456	757	<i>Bartramia pomiformis</i> (L.) Hedw.
15457	[Pease 10837]	<i>Polytrichum strictum</i> Banks.
15458	[Pease 10877]	<i>Pogonatum alpinum</i> (L.) Kuhl. var. <i>arcticum</i> (Swz.) Brid.
15459	775	<i>Polytrichum Ohioense</i> Ren. & Card.
15460	774	<i>Thuidium paludosum</i> (Sulliv.) Rau & Hervey.
15461	803	" " " "

The Spitzbergen things are tough. They are all sterile and I don't know as I can do much with them that will be very satisfactory. Perhaps I had better make a temporary (or preliminary) report now and later, if I get a chance to really study them, report again.

J.F.C.	15448	[Fowler 1]	<i>Dicranum</i> [near <i>neglectum</i> or <i>groenlandicum</i> ??]
	15449	2	<i>Hypnum</i> [harpidioid, near <i>aduncum</i> ?]
	15450	3	<i>Brachythecium</i> [near <i>glareosum</i> ?]
	15451	9	<i>Pogonatum alpinum</i> , var. <i>arcticum</i> (Swz.) Brid.

Very truly yours,

Collins, J. Franklin. 1908. "Collins, James Franklin Jan. 16, 1908 [Collins to Bartlett]." *James Franklin Collins correspondence*
