February 7, 1906.

Mr. J. F. Collins,
Brown University,
Providence, R. I.

My dear Mr. Collins:-

I have been ^{house} cleaning this morning and find that I have a number of New England mosses unnamed. I do not care to take the time to determine these, so I am sending them to you under separate cover thinking perhaps that they may be of interest to you. If you do not want them, throw them away.

Sincerely yours,

Elizabeth G. Britton

Mr. J. F. Collins,
Brown University,
Providence, R. I.

My dear Mr. Collins:-

We are back from our trip to Jamaica where we made a great haul of mosses, hepatics, lichens and ferns. Doctor Evans and Mr. Nichols were with us as well as Professor Underwood and Mr. Britton, so we had a good time and found lots of treasures.

One day last week Miss. Lorenz spent the day with me and we went over her puzzles. Among them was a specimen from Mt. Mansfield, collected on the Fourth of July trip, which proves according to Dr. Best to be either Pseudoleskea substriata or Lescurea frigida, from Kindberg's imperfect description, apparently the latter. Miss. Lorenz is sending you a duplicate at my request. I also enclose a specimen about which there seems to be some doubt, it may be of interest to you, so keep it.

I also had a call from Mr. Chamberlain, whom I had not previously met, and he told me of your having mounted the Wilson duplicates for Professor Farlow.

You may be interested to know that Mr. Williams is in England, where he has gone to pack the Mitten herbarium which we have just purchased.

With kind regards, believe me,

Sincerely,

Elizabeth Britton
