

29 Brewster St.,
Cambridge, Mass

Mar 26, 1912

Dear brother Collins -

I was more than pleased
yesterday to receive your 'Key to
Trees'. I had seen it the day
before at the Gray Herbarium and
had heard Fernow's encomiums
on the book and had determined
to get it immediately. It is very
good of you to think of me.

I have examined the book
carefully and am delighted with
it. After reading the preface and
looking over the book, examining the
attractive cuts and half tones, I tested
the key as I lay back in my arm
chair. I took Sassafras (to see how
the various shaped leaves would work),
Pinus (one 3 sps) & Camelanchesie.
It was most interesting to run
these down so readily. I can see

that the Key is most effective.
Of course a person using the Key
in spring for the Sled will base
worse some judgment when the
fruiting characters come in.

How does Preston come in on the
work?

I have just used your Key on the
Hop Hornbeam. Not leaving the five points
of venation in mind, I called the veins
corred and came to a warning on p. 36.
Then I went back to no. 44 and im-
mediately got it. Good for you.

Thank you also for the paper
on Chestnut Gall Disease. That
I must read. What a terrible
thing.

Dr. Robinson returns to Cambridge from
Cold Point Comfort on Tuesday the 28th.
I shall rejoice to see them again. They
won't stay long.

The work in the M. H. is coming.

Sincerely Helen Deane.

Deane, Walter. 1912. "Deane, Walter May. 26, 1912." *James Franklin Collins correspondence*
