

540 State St.,  
Bridgeport, Conn.  
Jan. 28, 1902.

Mr. J. H. Collins,  
My dear Sir,

In reply to yours of 27<sup>th</sup> inst  
would say I have a few mooses, some of  
which may be of interest. Am not giving any  
attention to moose, but during 1894 gathered  
these as being of some possible worth to someone.  
Mr. Groat looked them over, at his request. You  
may have any or all of them if you wish, for they  
certainly are of no interest to me at present.

I enclose my ex. list, from which you  
may be able to select some things worth  
the trouble. Mr. Williams says my specimens  
are the best he gets, and you know what that  
signifies - no need to refer to Messrs. Pringle,  
Bramard, or others.

After examination of this list would you

object to handing it to Mr. E. B. Chamberlain;  
or to some one who is an active field worker  
among flowering plants, and who would be  
likely to have a good selection of well prepared  
specimens for exchange? Rhode Island  
and S. E. Mass. are so poorly represented  
in my herb. that any active worker there  
should have a few things of a desirable nature.

Hope you will be able to make up a list  
of duplicates; but if not, I will send whatever  
you may want at your expense for transportation.

Hope to hear from you again.

Very truly

E. H. Emery.
