

Dec. of Apr., Sep. 15, 1892.

Dear Mr. Collins:

Your letter with
mosses received. Your way
of collecting and labelling is
very satisfactory. I am especially
pleased to see that you have an eye
for small things: I refer to No. 225,
probably a Bruchia! Most collectors
snatch up only large species, while
the rare things are small species.
— On superficial examination I
refer your mosses as follows:

82, Fissidens; 112, 160, 184, 216

Dicranum spp.; 153, 191, Leptotrichum

pallidum; 223, Phycomitrium,

212, 226, Weberia spp.

For full and exact determi-
nation I shall not find time
for 4 or 8 weeks, since I am at
work on the mosses of the District,
on which I am preparing as com-
plete a report as possible. I
hope this will not disappoint you.

Cordially, J. M. Holinger.
