

Winona, Minn., April 13, 1906.

My dear Mr. Rollins. Can you, by means of  
your excellent card catalog mentioned to me  
by Mr. Chamberlain, help me get on the track  
of a D. C. moss - a *Pleurozium* - made a n. sp. by Ren. & Card.  
from material sent to Cardot by me in 1891-1894, and  
proved afterwards (1895-1900  $\pm$ ) one of Austin's species?  
I have a positive memory that I sent my herb. specimen  
of the species to one of our two bryologists, who reduced  
it to a synonyme - of one of Austin's species, it seems to me.  
My plant came back all right, I think, but is now mislaid.  
And for 2 months I have tried in vain to dig it up, from memory  
and literature. Can you help a poor forgetful fellow? Yrs. J. C. Holzinger.
