

THE PINES, BLUE HILL,
READVILLE, MASS.

22 Feb 1897

My dear Sir

I am very sorry
to have lost the last
number of the New England
Bot. Club, but I had
a severe hoarse cold
& was not able to be
about.

I have been pegging
away more or less
at the Willoughby monn
& have laid by one
or two puzzles for
future study.
Mr E. Foxon has

Hypericum Cooleyannum, which is
not given in Lady's Botany.
This, as I find on label in the
Sullivan collection, is the
same as *Hypericum Haldanum*
and as I find no reference to it
elsewhere though you might
like to make a note of it.
I hope I shall see you at
the next meeting, Yours truly,
Geo. G. Kennedy

given me a thoroughly
Hypericum that he, I
suspect, despairs of.
I want me to go
crazy over. I have
not solved it yet.

Hypericum turbinatum
is one of the rarities
I have from there.

Evidently you can't
tell anything as to
localities from the
statements in Lesquer
James.

In looking over an
old Amherst Coll.
List by Edw. Hitchcock
in 1829 I find

Kennedy, George G. 1897. "Kennedy, George G. Feb. 22, 1897." *James Franklin Collins correspondence*
