

on Sunday and see the
late "Boiler" as you
call it, and also
watch you work
on mooses.

Very truly yr

Geo. Kennedy.

Readville Mass

5 April 98

Dearest Collier,

I am glad you
were not ill Friday: I
see by your letter that
your work must
at times keep you
very closely tied. I
spoke of coming down
some day, because
you said you had
been at home about
the same time that
I was also at home
with a bad cold & I
thought I might have
run down to see you.
I did not get to the
Club meeting either:
my influenza was

still pretty evident
I thought I had
better stay at home.
I think the important
Business was a
consideration of the
Report of Com. on
Publishing a Bulletin
of the Club, but I
have not seen Mr.
Williams to ask.

Four two Maine
finds in Minium
are extremely
interesting: I have
a spec of the subglo-
bosum it is Husnot,
725, a very good
frankly specimen.

~~Did I tell you~~
also No 33 of the
Mosses of Colorado

that Haltinger distributed.

Did I tell you of
Keeke's a triskis for
Willoughby Vt.
not in Grant's Prel.
List, proof sheets, of
the Mosses of Vermont.
Friday am. Having been called
of I will now add a few
words: Moullebeaux tells
me they have arranged
to publish a Bulletin
of the pages over a month,
that Robinson & Farlow
are both much interested
in it, and that it is
likely to prove of value
to every one interested
in New England Botany.
Whenever it is convenient
for you I shall be
glad to come down

Kennedy, George G. 1898. "Kennedy, George G. Apr. 5, 1898." *James Franklin Collins correspondence*
