

Readville Mass
3 June 1898.

Dear Mr Collins:

Of course I would
like a "digger" just like
yours. Who would it?
and if you have an
extra one, I assume
you it will be very
much appreciated.

I received your letter
of the 23rd about the
Bryum we worked
on & your dabbly
as to its being bimum,
& I have waited hoping
I might find time to
look at it again, but
have been otherwise
occupied.

I expect to go to
Wilmington at an

Monday next for a week, & Mr. E. Taxon who is now at Francine will join me there & probably Mr. Emile Williams will come up on Wednesday.

I have written to Grant that I shall go this Plymouth Vt on Monday noon & asking him to call at the station if he can arrange it.

I find the *Bryum argenteum* growing in the wet wall with our Newford *bimum*? is quite reddish at base, thus disagreeing with what Dixon says under *Gieria*

julacea, where the *B. argenteum* is said "never" to have the various red color.

I expect come back fr. Wellingbury Vt on Monday the 13th my address there is simply

Wellingbury Vt
Yours
E. E. K

Kennedy, George G. 1898. "Kennedy, George G. June 3, 1898." *James Franklin Collins correspondence*
