

Readville Mass  
27 Feb 99.

Dear Mr Collins:

I am glad to have  
you call my attention  
to the terms Braithwaite  
uses for the forms  
of autoicous inflo-  
rescence, & I shall  
try to adopt them  
into my mind  
when I think of it.

I enclose Mrs.  
Britton's letter abt  
the Evans' Guinea,  
and also your  
sketches of the seed  
leaf. I think it  
very kind of Mrs Britton

to propose that we  
name the cross,  
but I don't quite  
see what right I  
have in the matter  
nor do I know  
just what is custo-  
mary to do.

I thought it was  
her cross and if  
new to be named  
by her, but of course  
I am very apprecia-  
tive of her kindness  
if it is right for her  
to retire from the  
business but I can't  
make up my mind  
that it is.

I have been at work  
on that Pothia, which  
appears to be quite  
a new thing: with  
a border of long, even  
prosenchymatous cells,  
and an unequal  
capsule with a  
gymnostomous mouth  
open oblique. I  
find no other Pothia  
like it. I hope to  
go to the Club  
meeting on Friday  
evening. have not  
been for a long time.  
very truly yr  
Geo. H. Kennedy
