

marked from the top of the Mt.

I have not yet written
out anything, perhaps I
shall feel more like it
at the last moment.

Yrs G. G. K.

P. S. If I had not been at
Katahdin I might
get tired of this month
of Rain.

Readville Mass
24 April 1901.

Dear Collins:

Fernald was here
Sunday & said Friday
eve May 3^d would do
for our miss list. so I
hope you can fix it to
spend a considerable
portion of that day
here & we can go over
the whole matter. If
you would like to have
Mr Chamberlain here too,
it would give me
pleasure to see him.

I am expecting to hear
your report soon all the
time. I sent you.

I have a *Fissidens Fernaldi*
brought from wall of
North Basin that appears
to be *osmundoides*, but
with rather smaller cells

than usual. You have the *Mullchoferia* double
starred but is it not the same moss as in Austin,
Musci Appal. from Mt Washington?

Fernald proposes to have in his list only
plants from Depot Pond & above. If we
follow the same plan it would exclude my
Meckera, & *Leucodon* & *Dichelyma* which are
all from a lower level. I quite agree with
you to call the list a "preliminary" one.
Your letter of yesterday has just come with the drawings. I
have no doubt now that my *Die. falcatum* is var *Eatonii*
of *fuscescens*; and the *Hyp. palustre* also I shall call im-
poverius after seeing yr figure. I have been comparing
the *Mauium* & tho it has no fruit the cells are too small
for affine, too large for *crispidatum* & in fact suit best
in measurement the *rostratum* as given in Dixon. Therefore
you some of it. It is mixed with *pinetatum*, and in
fact the teeth are often abt. obsolete on young shoot leaves.

I have found in the mosses Mr Faxon gave the N.E. Bot Club
very good *Hypnum montanum* fr brook on side of Cannon Mt.
Profile Notch N.H.

I find in my Herb *Mnium rostratum*
I collected in Alpine Garden Mt Washington 23 June 98 that
agrees well with the Katahdin specimen. I send you a
map that has come fr Capt Rogers, "one for each member of the Botanical
party" — I suppose you have the var *Eatonii* in fruit. I have
just been looking at mine & appear to have plenty in fruit

P. S.

I sealed up the other letter without putting in the Minium, so I enclose it here,

also the list of which I have made copy. I have added a few hasty pencil notes.
Yrs G G K

24 April 1901.
