Dear Collins -

If you get back Friday night why don't you come down & Tousset Saturday. I shall stay down that day & have the ms & photos here & the manual & Sargent & Hough. & Emerson. Have checked up the drawings & photographs - & worked on the distribution & the list of species & the index.

The thorns on the apple seem to trouble some people - perhaps we eliminate that character.

Do we need the systematic arrangement of species by families? If so it is not better to use stakes for foreign tree & not try to distinguish American native outside our range & only cultivated

with in.

Juniperus communis seems to be included in one section under "Leaves awl shaped" & in another section under "Leaves not awl shaped"

Come down Saturday morning or afternoon or both - the day. We will get some work done. If we can introduce any improvement in language or arrangement now is the time to do.

Did you suggest it was hot - It's better today however

A.H.P.

Preston, Howard W. 1911. "Preston, Howard W. July 13, 1911." *James Franklin Collins correspondence*
