

San Marcos Jan<sup>st</sup> /50

My Dear Dr

ouk)

I should not have troubled you so soon again but for the sake of a friend to whom I am indebted for many acts of kindness.

Last Spring when I passed through Austin I wrote soliciting you to send certain books to Mr Hugh McClellan of that city. They have not been received & I don't know whether you rec'd my letter. They were "Allen's Agricultural Book of the Farm" "The Scientific American 6 months commencing 1<sup>st</sup> Jany<sup>1850</sup>" "The Working Farmer Edited by Prof. J. Mapes from its commencement" By the prospectus it was to have been issued in Feb'y last. He wants the back numbers of this last and to subscribe for the present year also.

It was his understanding that the above-mentioned works were transmissable by mail.

By sending or directing to be sent these works you will much oblige a friend of mine and consequently one charge them to me & Mr McC will pay me whenever called on.

Now a word of botanical matters I am gathering the mosses & Liverworts of this neighborhood but at present most of my time

is spent in skin-dressing; for next year I meant to have some leather clothing as a protection against the brans & thorns of Western Texas & Mexico is prudence I shoud travel in that Republic

In my last letter to you I enclosed some Lichens for Mr Guckermann Tell him that I will put up some more in a few days the names of which I wish him to report to me

I found yesterday a spring plant making good use of a few warm days we are now enjoying and nearly in full bloom It is Umbelliferous and abundant in the San Marcos valley I will get a specimen and send with the Lichens or in some other way soon

I am waiting for letters from you & from home with considerable impatience

I send herewith a communication which I woudt be glad you woudt show to your professor of Chemistry or any other person or persons who you think woudt give me the theory of the process I have ascribed to oblige

Yours sincerely

Chas Wright
