

San Marcos March 8th /50

My Dear Doctor

I have just receive yours of Jan'y 27
and would have answered it before but I have been gone
down to Columbus and elsewhere on business.

I have made such arrangements that my letters
will be duly forwarded to me whether directed to
Austin or San Antonio and I always, of late, make
such arrangements whenever I leave a place to reside
in another. I have probably received all your letters
and have duly answered them, briefly perhaps, but touching
upon all matters that I thought essential.

I hope you will take my word that I did not neglect
my business while waiting patiently, not "supinely" at
San Antonio. Believe me that I can judge better than you
of the ease or difficulty of transacting such a business
affair as I had on hand in San Antonio. If the same
business was to be done in Cambridge or Boston or
New-York you could manage it far better than I
and you might transact the same business ~~base~~ far better
than I could. But I hope you will not enter judgment
against me in Cambridge when the court should be
held at San Antonio.

Let me tell you a word about hauling in this country.
There are waggon not a few now on the road between
Austin and Houston which have been three weeks, yea month,

and with the prospect of staying there some weeks longer

I wrote you in my last that the package ~~could not~~ be carried
in the stage. It not unfrequently happens that passengers are
obliged to leave a part or the whole of their baggage or stay
behind themselves.

I wrote some time since to Gen Brooke asking for
transportation &c No answer has been received & from his
silence I judge that I have nothing to expect from that
quarter. I now learn from common report that the hauling
is let out on contract at \$10-11 per hundred - of course I
will have to pay the same or stay at home. My present
opinion is that my next summer trip will prove a "no go"
The train starts on the 15th April little more than a month
hence and no preparations are yet made so far as I know
for enabling me to start with it.

You have once or twice said that you would send packages
for me to Asa Colean "to be sent for" so I said nothing about
forwarding in my last. Any thing for me can be forwarded
to Fulton & Heemley Port La Baca where I can get them
by some means sooner or later. It is the most convenient plan
to send to from this part of the country.

I hope before this you will have learned that I have
gumption enough not to "pack up the fleshy brittle - with
the new plants".

I have now touched upon the principal matters in your letter
I mean to go to San Antonio soon & see what I can do in
person, though I think our arrangements for next summer's
operations will fail I will not relax my exertions.

I have now a good horse, to procure which has somewhat
reduced my funds and outlay for clothing and travelling
expenses has also descended largely upon them.

If I had time now I might collect \$100 or more perhaps
As I have made no arrangements for my next summer's
work other than that of going to El Paso & S.ervit &c
if these should fail could you give me any employment that
would benefit you and be instructive to me and eventually better
fit me for following up our present plans. I have a strong
inclination to go north and see my friend but I willingly
yielded last fall in hopes of proceeding with my botanical
researches the ensuing summer under more favorable
auspices. If after making all honorable exertions I should
fail I must be thrown on my old profession - teaching - or turn
my attention to forming or spend my time almost unprofitably.

When you go to Europe please remember that I want a
good microscope. Consult your own judgment on which
I rely much more than on my own. You can doubtless pay
for one with a set or part of one of my collections.

I would also like a copy of Endlicher's Drachneria

I enclose (I might have done it before but did not think it
necessary) the bill of lading of my packages among which you
must say you now be luxuriating.

I wish you much pleasure on your visit to Europe
& hope it may be found to your advantage professionally
and pecuniarily. I am anxious to know whether the Flora is
making any progress and whether the Plantae Endlicherianae
is complete. I feel deeply the want of something on the lower

Families of plants especially the Onagrum

Give my respects to Mrs G. and accept my wishes for your
long life health & prosperity

Affectionately Yours

Chas Wright

P.S. I wrote that I had received no answer from Gen. Brooke
It was mislaid & has just been handed to me I enclose it

C. W.

P.S. 2d I have now plenty of fine specimens of *Tillaea Drummondii*
Gratiola pusilla & *Lepuropetalon spathulatum* and can send them to
any one who wants
