

San Blasario Jan 25th 1859

Dear Dr

I wrote you by Col Graham  
Since he left I have surveyed the Rio Grande  
from San Ignacio thirty miles below this place to  
the canon where the San Antonio road first strikes  
the river When we start below to work again we take  
pack-mules

~~Be near at  
Maryville  
Wash~~  
Maj: Remond was to start yesterday in quest of Mr  
Bartlett It is doubtful whether much about surveying  
is done before he returns The Commission is out of  
money and we must have pack-mules before we can organ-  
ize another surveying party Maj: Remond's orders are  
all given for the prosecution of the work but they will  
be ineffectual unless the Quartermaster can furnish the  
means—thus throwing the responsibility of the neglect  
to continue operations on the Commissioner Perhaps  
I will be able to tell you more about it before this is des-  
patched

I received by last mail a letter from Dr Torrey in  
which he announces your return also two from Dr  
Engelmann who says he has some money for me which  
I have directed him to send to you and you can find some  
way of paying it over to my brother as well as any  
other money which you may have now or hereafter for  
me His address is John G. Wright Wethersfield Conn.

I received also a short letter from Mr Guckermann who  
seems to be in great glee over the collection of Lichen I made  
two years ago He speaks of them almost in raptures and  
modestly begs some "more of the same sort" but says not a  
word about money Could not you squeeze him a little  
once more Not that I need money I have so much  
here now that it is only a trouble to me But my brother  
does And further more I think he ought to pay something for  
the pleasure which he is evidently enjoying

I was somewhat disappointed at receiving no letter from

you But no importa I suppose you have hardly got  
into working trim yet since your return to Cambridge  
I shall be sadly disappointed if I do not hear from you  
by next mail

Eangelmann is in a quandary under the conflicting  
instructions of Col Graham and myself—the former direct-  
ing him to despatch the Lactaceae collected by me and send  
them with his report or them to his address ~~as~~ to Washington  
while I told him to reserve a portion of them for me

You may be in the same perplexity, and I will say to you  
as I did to him that ~~you~~ if I were with you and had the  
control of the plants I would save two or three sets and turn  
the rest over to (trust him) but to that branch of the Government  
to which rightly belongs the custody of such things. You will  
be more the wiser <sup>and I believe</sup> I should have no conscientious  
scruples in practising a little deception on a man who  
has shown himself so liberal to me in this matter as  
Col Graham has. Neither Mr. May Emory nor Mr. Battell  
manipulated my hesitancy in promising me that a part of my  
collection should be reserved for me although I presented no  
reasons why I wished for some but to Col G. I offered the  
most satisfactory reasons such as those that my paper was  
my own I rode my own horse while others better paid are  
doing absolutely nothing and I am laboring assiduously not  
only as a botanist but as a Surveyor

During my travels through Sonora I made memoranda of some  
plants which I did not collect such as

*Solebia cardinalis* on the San Pedro and elsewhere  
*Bidens connata?* or *Chrysanthemoides glabrum* <sup>on the Bruley mons.</sup> *magnus folius connatus*  
*Talinum pectinatum* Northern Sonora Common  
*Berberis bipinnatifida* " "  
*Potentilla oleacea* & *lanceolata* common  
*Ritis quinquefolia* on *Bubo virginianus*  
*Rhus typhina* " "  
*Gaura parviflora* Santa Cruz  
*Oenothera aptera?* Santa Cruz Wet places  
*Hedianthus coccineus* coppermine and elsewhere common

Feb 2<sup>nd</sup> an express from Santa Fe recalled Major  
Domingo when he had been gone but a few days and  
on his return to Fronton he crossed the river below here  
and took this place in his way. I am ordered below to the  
vicinity of San Ignacio and preparations are making  
to push on the work with as little delay as possible.  
I know nothing of the nature of the despatches lately sent  
to the Commission nor of their contents. I only know that  
they have sent the Major a trip to the Gulf—perhaps The  
prospect for botanizing the ensuing season now looks stand-  
ing the Major's promise appears gloomy. I will do  
however what I can. I am now shooting birds and learning  
something of ornithology for want of something better  
to do. I have found one plant beginning to flower already  
probably a *Nuttallianum* I did not examine it not having a  
book with me

Yours truly  
Cha S Wright
