

Some obstinate Orchid Papers
etc.

26th Filantupia. I came down
day before yesterday. We had a
miserable cold rainy Christmas.
Mr. B. takes the draft though
he does not want to deposit
money in the States. On the
contrary his transactions in
copper require him constant-
ly to draw on the Company in
N. Y. for the payment of labor
& other expenses here. I pre-
sume however he will at any
time to accommodate me
advance me money to be
paid in the States if I should
need it which I hope I will
not

I have not yet learned whether
you have ever drawn any

La Madelina
Dec 24th 1859

My Dear Dr

Yours of Nov 19th was
sent me last night by
Mr Bradford. I am rather
pleased at the arrival of the
draft as it makes me easy
as to money matters in case
I should deem it necessary
to buy a horse. I shall run
down to Filantupia this even-
ing & turn it over to Mr B.
if he can make use of it
I am glad to hear of the ar-
rival of the second lot of plants
in good order. What is Hemio-
nitis, that Dalton says I should
get again? There is no such

fern mentioned in his letter
I suppose Lindley does not
care to have me send him by
means of letters (as I send to
Dr.) small orchids that I may
from time to time pick up. I
suppose it is just as well for
him to get them as he is sure
to do all in a lump.

I have got about 50 sp. of
ferns here $\frac{3}{4}$ of which I think
I can safely say have not been
collected farther east. Of course
I have neglected those which I
am certain I had already got
at my other stopping places

I have noticed a curious hab-
it of *Gleichenia* (if it be uniform)
— a kind of epiphytism. I
have seen as many as 8-10 bunches
I suppose. Of the greater part
I took no particular notice

but all that I did observe
particularly — some 3-4 were
growing on the trunks of other
trees. In my next excursion
to El Monte ^{Salguero} I mean to exam-
ine them more carefully

I think two or three excursions
more here will do for the pres-
ent. I have intended then to get
together my Mount Sopiri
gatherings & those from this
place & send them off but it
will require several days
& I wanted to be off a little
way into the interior about
the first of the year if possible.

We have had now 2 or 3 suc-
cessive days without rain &
with considerable sunshine
which I have improved with
my black-board in drying.

Wright, Charles. 1859. "Wright, Charles Dec. 24, 1859." *Charles Wright correspondence with Asa Gray*
