

Matanzas Aug 15<sup>th</sup>/65

Dear Dr.

My dues plants are deposited with Loay to be sent by the first good chance to Boston. Tomorrow early I shall see that they are boxed up in good order and then I go to Fernina to look after Lundbeck who I am told is sick and that he had a fall. As soon as possible I shall come home to Habana and thence to friend Blain's.

The plants are thrown into families according to the "Tabular arrangement" given by Grisebach in his *Introductio*. But they will be in two series. Those collected in the Cenago form one series those since in Palma Isle & La Paula another. It will be but little labor to combine them. In the first collection there may be a few unarranged — the last of those done previous to my going to Matanzas.

I send you Moreles' "*Gasterocereus armatus*" Please keep it for me in "my pigeon-hole". It is *Aerocarpia lasiospatha* <sup>suppose</sup> I believe I wrote you that I might send you a lot of my observations of Cuban life. If you have time and inclination read it & forward to my brother. I put in also some parcels of mud for Sullivan. Please forward them when convenient.

If I have omitted a half dozen things and badly written others please charge it to the account of the weather which is excessively hot and sultry. I don't know how I stand it. I want to get when I can offing every thing but pants & shirt and let these hung loose outside.

Yours truly  
Charles Wright
