

Valstena Oct 14th 1865

Dear Dr

No word yet from Eisebach. I wish you had sent me the "Catalogue": before now you could have had another and it would have been so useful to me: whereas I doubt if you have consulted it half a dozen times.

I have been pretty busy with ferns & grasses. ^{byperuced} I found a single plant of what strikes me as a new *Adiantum* but as I never before have studied these plants I cant trust much to memory. I got lately three fruits of that great *Jatropha* with digitate 15-foliate leaves. Don José has called it *J. urina* but it is nothing like the character given in London. Yesterday was dull & cloudy. today is duller and raining and I am bringing up my lagging correspondence.

I dont yet go far from this place - havent yet been to Rangel nor to the savannas. Havent settled yet the pass business and cant travel till that is all straight - dont know when that will be. Havent heard lately from Cay. Suppose he will let me know when he sends the plants he ought to have despatched them before now.

I am in excellent health and tho very comfortable here and busy too I want to get into a new field.

Cant you beg of Brewer a stereoscopic view of the Big Tree and send me. I want some more pictures. They are ^{useful} ~~use~~.

What is the difference between 3-nerved & triplinerved?
(*vid Ischrudya rufescens*)

I return you Eisebach's letters which you sent me and one (the last?) from Sir William Hooker which you

will want to keep I suppose

Yours ever
Chas Wright

P.S. Please try to send my "cartica" for Mr. Curtis

Prof Geo Lloyd
Cambridge
Mass.

Wright, Charles. 1865. "Wright, Charles Oct. 14, 1865." *Charles Wright correspondence with Asa Gray*
