

Cambridge Nov 23rd /68

Dear Dr.

Done distributing and packing up in a hurry
to get off before Thanksgiving. Fingers sore with
twine tying up bundles. I made 19 sets besides
young, Kew, & Lauvalle. The sets run thru 2250
(call it) 2200, 2025, 1715, 1550, 1460, 1330, 1275, 1165
960, 780, 750, 660, 620. ⁷⁵⁰ Bew 560 or (call it) 500. In
I put in some old numbers when specimens were
abundant and particularly nice. The parcel
will go to Boston in a day or two.

After mentioning Boit, Mrs. Anderson,
Reichenbach, St. Petersburg as wanting the numbers
for which I have made no provision you write
"As to residual collections I won't save some few
and send the rest to Reichenbach &c". Now I want
to sell some here if possible & I believe it is. Mr
Scudder talks encouragingly. Eaton promises to
use his influence & I think I shall write to him about it.
Baird asking him to try & find me purchasers.
I was depending on Miami after I went to Cuba
now I must look to my business myself. And
under this change of circumstances I see not
how I can return there at least right away.
In my life I never realized so vividly the
perplexity of the uses between the two piles of
grass. I want to go to Cuba & I want to stay
here. Ambition says go; prudence says stay. If I
go I shall spend from the start; if I stay I

I may earn something or not my own & spend less. I shall at any rate. Oh if Mann had gone at my suggestion it might have saved him. & released me.

230 Oliver's queries are at hand and already answered. I did not before suspect that it was brought from Africa to Baba but now that the question is raised there are circumstances attending its occurrence that favor the belief of its foreign origin.

Tomorrow I shall clean up the Herbarium (except poor Mann's room which is in dire disorder besides buried in dust - but I dare not touch any thing) and on Wednesday home - just in time for Thanksgiving.

Wright, Charles. 1868. "Wright, Charles Nov. 23, 1868." *Charles Wright correspondence with Asa Gray*
