

Orono, Maine,

June 5, 1898

Dear Dr. Robinson:

I seem to have left Cambridge for a rainy country; at any rate it has rained here most of the time since I came, though the sun comes out now and then for a short time. I never saw vegetation so advanced at this season, nor so luxuriant. Choke cherries and Thorns are nearly out of flower and the herbaceous things seem to me at least a week ahead of those about Boston. Huacleum is in flower and Zizia aurea is already well fruited. I have gathered Aster amellus until I have no more available dries for them - all the forms we get about Cambridge and big plantainleaves two feet tall, I am delighted to find A. neglecta var. subcorymbosa in great abundance

everywhere with neglecta bases and  
neodioica inflorescences. A. Paucium  
var. ambiguum is common, and there  
is another common plant on the sandy  
and gravelly lawns, growing very tall,  
with long pedicelled heads, coriaceous  
leaves small and scattered, and beautiful  
glossy Paucium-like base leaves; with,  
however, not a trace of glands. I am  
puzzled to know whether to call it  
a variety of plautaginea or a distinct  
species. The varieties of A. neodioica  
seem well marked but only as varieties.  
I have three forms of Pomoeocas abortivus  
including fine specimens of var. encyclus;  
and the blue violets are proving of a great  
deal more interest than I ever supposed  
before. Yesterday I got the dull culiculata  
leaved plant of the meadows, the ovata  
form of sagittata, and three other forms  
apparently quite distinct, especially  
a plant of the dry upland woods with  
glossy dark leaves and pubescent scapes  
& petioles.

Tomorrow I go to Dover to investigate  
the flowering Anemone sibirica, and  
Tuesday I start for three weeks in the  
Acrostic.

The collecting thus far has been very  
satisfactory for in the two days I have  
been out I have got five species new to  
Kauai - excluding Rutemannia and Viola.  
My address will be here through the month,  
and mail will be forwarded to me at least  
once a week when I make my whereabouts -  
known.

Should the Rutemannia paper come out soon  
will you kindly send me half a dozen  
copies.      Hope everything goes well  
at the Herbarium.      Regards to the Mu.

Keenan.

Cordially yours  
Reinhard L. Fernand
