

GRAY HERBARIUM OF HARVARD UNIVERSITY,

BOTANIC GARDEN, CAMBRIDGE, MASS.,

Aug. 27.

1901.

Dear Dr. Robinson -

This day has just written
directing me where to find such proof
of the revised Lessons as she could
remember about. I have found
portions of the proofs - sometimes some
pages, but many parts are lacking.
I have looked everywhere I can think
of for the rest but it does not seem
to be in any of the ordinary drawers
or cupboards. I trust however that
you have some parts with you which
will fill the gaps. I am sending
such as I found by registered post.

The enclosed notice just came
from the Post office. I don't know
about the money order. Perhaps you

Can throw some light on it.

The plants are essential all out of press and in the poison cans. Only the Prenanthes remains moist.

Sunday while canoeing on the Sudbury I found a large patch of Dessudium paniculatum in splendid condition with abundant flowers and plenty of young fruit. If no one turns up to detain me I shall plan to get out to gather it in Thursday afternoon, getting it well started in press before I go to Martha's Vineyard for Sunday & Monday.

The Potamogeton turns out as I thought, P. polygonifolius, recorded by Arthur Bennett in the July Gazette from Newfoundland and St Pierre - its first record from North America. I find on studying our Herbarium material

that we have it from a large
number of stations - Lake Champlain;
Spat Paud, Stoneham; Charles R., Wellesley;
Lake Daltonstall, Conn.; Ottawa River;
Nipigon River; and Salt Lake City.

I shall send you a short article
on it for Rhodora very soon -

Moderely yours,

Heribert L. Fernald.

Fernald, Merritt Lyndon. 1901. "Fernald, Merritt Lyndon Aug. 27, 1901 [Fernald to B.L. Robinson] [2nd item]." *Merritt Lyndon Fernald correspondence*
