

GRAY HERBARIUM OF HARVARD UNIVERSITY,

BOTANIC GARDEN, CAMBRIDGE, MASS.,

Sept. 13, 1904.

Dear Dr. Robinson -

Thank you for
sending the mileage book.

I got back from Edgartown this
morning with seventeen sets, and
we are now all busy running
them into press. Among other things
are Polygala buttallii, Chrysopsis
falcata, Spartina n.sp. probably -
at least not in the manual nor
anything I have yet looked over; and
the true Polygonum maritimum, a
beautiful but little known plant of
which we have three poor sheets, only
one with accurate data.

I found a good colony of Lactuca

Marssii as I suppose. It was too old for a set, and I left it until the last before trying to get any for identification. Then a wild storm last night & the necessity of getting my sets packed prevented my securing a Specimen. It is in a good safe place, however, and has fruited abundantly.

Williams sends the enclosed for Rhodora. Either he or Dr. Kennedy will send very soon a note on Juncus scirpoides from the Cape - a plant long reported from Mass. but without any good verification.

Sincerely,

Herbert L. Fernald.

Fernald, Merritt Lyndon. 1901. "Fernald, Merritt Lyndon Sept. 13, 1901 [Fernald to B.L. Robinson]." *Merritt Lyndon Fernald correspondence*
