

San Luis Potosi,

7, August, 1890-

Dear Mr. Watson:

Accept my thanks for
your favor of July 29th.

My agent wrote me of having
received \$20 from Kew. I presumed
it was in payment for sub- of 1888.
I will enquire if he has the pay
for both years.

I am pleased to hear of
new things in my sending, but
I can only guess what plants were
numbered ^{3102 and 3137} since at the time of
sending to you I shipped home
the collection represented by
the specimens in your bundle.
Will you please enclose in a

letter to me here bits of 3102 and 3137 — a leaf and flower, that I may try to complete the specimens.

Of 3137 were there not — two branches on the sheet? If so they represented both sexes of a dioecious shrub; though the few open flowers on the male plant may have escaped your notice or may have got lost altogether.

I have wanted to ask you to append to a list of the n. sp. of the list sent me the other day the dates and localities, that I may have a clue to duplicate specimens being in my Vermont home — and may take special pains to get them into my next distribution. If you are too busy to do this, let me not trouble you.

[P.O. Box] Yours faithfully
apartido 92. C. G. Pringle.
