PROVIDENCE, R. I., Feb. 13 1899

Dear Miss Day

Yours of the 8th at
hand a few days ago. I have
written to a botanical friend
of mine who was officially
connected with the Prov. Journal
at the time the article on "Wooded
Areas" was published, inquiring
as to who wrote it. If he can
inform me I shall let you
know as soon as I hear from
him. This, however, may
not be for a week, perhaps,
as he now lives in Erie, Pa.

I think I can get a copy of
the paper with the article & will
try at any rate.

In case you fail to get a copy
of #1, Vol. I. of "Random Notes on Nat. Hist."
you may be interested to know that
that there is but one article of

a botanical ^(?) nature in it (page 7.)
That is headed "Quercus magnifica"
and signed "F.D." It is a
historical description of a ^{venerable} white
oak at "Munroe's Four Corners" Seekonk
Mass.

Very truly

J. Franklin Collins
