

J. FRANKLIN COLLINS  
468 HOPE STREET, PROVIDENCE, RHODE ISLAND,  
U. S. A.

4, Sept. 1905-

Dear Fernald.

Here are 5 samples labels for criticism and selection. Regular ink has not been used and in this respect you may find them more or less uneven and smudged. "A" comes nearest to <sup>and) like it as well as any,</sup> your ms. label, but I fear when a lengthy note is inserted it may look somewhat <sup>crowded +</sup> irregular on account of "Collected by" being 6 pt. type and "Ge. Cora R." 8 pt. and consequently ~~the~~ difficult to place on same line.

I think "E" will, under most conditions, make a more symmetrical label, Besides leaving an extra line in case of notes. Perhaps no better, however. On account of symmetry I have also placed the number on same line with plant name. It can just as well be placed above, as on N. F. label, if you think best. It would, however, use another line which might be useful for "notes" If course in case of long notes we could use a larger label but it seems best to keep all a uniform size if we can do so without having any appear crowded as to type.

How would it do to leave off the "No." as in  
case of "B" & "C"? In case of a long  
plant name it might reduce the length of  
that line to better proportion.

In regard to proof, would it not be a  
saving of time to have you write plant names, <sup>furniture,</sup> and  
data with special care and have me copy  
them exactly? I haven't the facilities  
for operating more than 2 or 3 forms at the  
same time. and this would mean that such  
form would have to stand by for a couple of days  
until I heard from you. Personally, I  
would much rather run the chance of having  
to reset a label - where a mistake occurs in  
the first - than to hold every form in type  
for 2 days. I am willing to take the  
risk of error at my end if you are at  
yours. To be sure, a 2 days wait will  
often be all right but on the other hand, I  
may have time to go ahead with half a dozen  
consecutively.

Is size of label and quality of paper O.K.? Please return the sample label which you think is best, with such alterations as you may think advisable. How about type? all right, do you think?

Yours etc.

J. F. C.
