

April 28, 1936.

Dr. Paul C. Standley,
Field Museum of Natural History,
Chicago, Ill.

Dear Dr. Standley:-

At the suggestion of

Prof. Ames, I am writing to ask whether
or you plan to publish from the
Field Museum ^(otherwise) the new species that
^{occurs} ~~appears~~ in ^{the} preparation of the Peruvian
orchid flora.

(but not typed)
I have already prepared my treatment
of the very beginning of the
Peruvian orchids including Phragmo-
pedilum and Halenaria, and I have
~~already~~ described four new species of
Halenaria in the process. In case
the novelties are to appear in the body
of the work, it will be superfluous,
of course, to give the brief descriptions
that characterize the other species.

It occurred to me that it might
be advisable to send small batches
of the Peruvian manuscript ^{from time to time} as it
can be prepared.

Judging by the (specimen) sampler
of proof which you sent, there seems to
be no set order of citation ^{or sequence of} ~~of countries~~ or
departments. I have adapted the ^{plan} ~~form~~
of working from north to south i. e.
from Cajamarca to Puno etc.

I have identified the ninety-three
orchids (mostly Costan Rican) recently
sent by Dr. Simms, and have found
among them a new ^{which I shall ~~as~~ describe} Telipogon and several
sheets which are being photographed.

Trusting to hear from you ^{about these matters} at
your convenience, I am

Sincerely yours,
C. S.

Cent. to Prof. Charles Ames.
