

New York, March 5th, 1896.

Dr. George G. Kennedy,

Dear Sir,

I shall be pleased to give you any assistance in my power, especially as you are willing to help yourself. I have no doubt you will be able to name most of your specimens correctly without any help, but I will either send you material for comparison, or have verifications made for you, if you prefer.

Please accept your thanks for the specimens of Tetraplodon, which have been received, as well as for the offer of other duplicates. Yes, we shall be glad to have them, as we are constantly exchanging and I think I can put you in the way of some exchanges with them, if you care to do so. Mr. John K. Sma~~th~~th, our curator has fine collections of Pennsylvania, and Georgia mosses, which he will be glad to share with you, and C.G. Pringle, has Vermont, and Mexican specimens to offer. When you get your specimens named up, write out a list of the names and let me have it, and I will see what I can do for you. Do you want any foreign mosses? I have one Scandinavian bryologist who wants American mosses. But I want you to join the League of American Bryologists that we are getting up, and promise me not to send any American specimens abroad unnamed or in bulk for distribution in exsiccatae. Prof. Eaton supplied Gardot with a lot of White Mountain specimens, and he has issued them without any exact localities or dates, or habitats, and with written labels a distinctly lower standard than has ever been taken on any of our Exsiccatae.

Very sincerely yours, Elizabeth G. Britton.

Britton, Elizabeth G. 1896. "Britton, Elizabeth G. 5 Mar 1896." *George Golding Kennedy correspondence*
