

2965 Decatur Ave. Bedford Park. N.Y. City.

Jan. 27th, 1900.

Dear Dr. Kennedy.

I have working with me for a few weeks, Miss Abbie M. Small of Northboro Mass., one of our Chapter members, who is making a list of the mosses from Massachusetts in our collections, with a view to finding out what species have been reported from the state, and where the least collecting has been done. She has some collections from the Berkshires, as I have still unstudied, and we shall have a set of duplicates of mine to send you in a few days.

Meanwhile will it be too much to ask of you, if you will look over this list of Sphagnums, and make any additions from your own collection that you may find represented there.

Miss Small and I shall go over to the Museum this morning and look over the file of Rhodora to see what local floras listed by Miss Day contain any lists of mosses. (If this is noted, which I doubt.)

Meanwhile can you give us any suggestions?

Tuckermans collections from Amherst must contain many things not found elsewhere, I have written to Mt. Collins. Is there anyone else?

With kindest regards believe me yours sincerely,

E. L. Britton
