March 20<sup>th</sup> 95

My dear Doctor,

I'm sorry to hear that you are on the sick list & that you will not be able to join us tonight. I hope your Lumboago will prove to be of short duration & not interfere with your joining us in the Purgatory trip next Sunday. I'm bound to go there this time rain or shine as I must have the S. foetidus in full flower & now is the time for it.

We missed you at the Faxon's last night & wondered what kept you away from us. We went into Epilobiums somewhat as the Faxons were not up especially in the distinctions between E. coloratum & adenocaulon <sup>+ dimorph from it.</sup> was not up in the E. lineare, strictum, + lineare v. palustre & Labradorica. It was very interesting. I return you the Moss book with thanks. I have ordered one as I find it a most excellent little work & just what I want. I see you are subject to a fine of \$1. for lending it to me but seeing its you I'll let you off for .50¢ & say nothing more about

it. Mr. Faxon gave me some *Epipterygium strictum* from  
Willsborough - a very northern station I should say -  
I could not find it there again even with his help.  
Also he finds that a long long time ago, Fockerman  
found *Hedychium paniciflora* there - on the cliffs -  
It is a very rare plant having only been collected  
at Lyndon Vt. by Congdon (?) I believe. Fockerman's  
Specimens of which Mr. Faxon has one was  
believed until recently to be *Hedych. rostellata*.  
Recently it has been made out to be *H. panicifl.*  
& we must look for it - It looks for all the  
world like *H. tenuis*, rather short. Miss Lutmerista  
will be ready for you I suppose next week  
she ought to finish up with me tomorrow  
or Friday - She is doing very nice work now  
& I hope you will be pleased with the skill  
which mounting almost 1000 Specimens for  
me has developed in her.

Hoping to hear soon that you are all  
right again I am

Very sincerely yours  
Emile F. Williams
