

of fruit enough surely
for the town - We drove
yesterday afternoon to
Lauterbrunnen Valley &
Saw two wonderful water-
falls & have come today
to this valley when two
glaciers come down each
side of a mountain that
towers up to 10,000 feet
& the noble Wetterhorn
clings the valley at the
west. We are all very
well & send you & Mrs.

Deane many good wishes.
I hope you will keep me
with the Postal cards, they
are good to receive in this
distant land, Truly yours

G G K

what is this?

I send radical leaf &
cauline leaf on

Grindelwald
Switzerland
24 July 1886.

My dear Mr Deane,

This is the finest
valley I ever saw, with
green fields, precipitous
rocks & cliffs & snow
clad mountains stretching
away to the fleecy white
clouds rolling in the blue
sky. The wealth of flower
life is indescribable & you
& Mrs Deane must surely
come over here some time.
You will want new little
baggage, two hand sacks
will do for clothing, but
bring your biggest trunk
full of specimen sheets &
then you won't have
enough, in other words

I am overwhelmed with "material" and shant be able to bring much home. Last Monday we went up the Rigi 5906 feet, by the Railway, and you will have been pleased to hear how often your name was mentioned as we passed some lovely gentian or peacock orchid. Hal kept saying "Mr Diane would certainly jump out for that" Our train went abt 4 miles per hour & the road is steeper than the Mt Washington R.R. We walked half way down & got the Botanical Box filled full. I put them into sheets without trying to name them, there were

probably 40 things new to me, but I am sorry to say some of them are not good specimens, being too hastily gathered. Two beautiful Gentians marked rare in Grindel's Flora of Switzerland were plenty, or at least one was, *G. purpurea*; ~~the~~ while the yellow variety I could find only one specimen -
Carnices are not plenty here I have seen very very few and ferns do not seem very abundant -
We came to Interlaken from Lucerne via the Brünig Pass carriage road. Interlaken has the finest Walnut trees I ever beheld, seven to ten feet in girth

Kennedy, George G. 1886. "Kennedy, George Golding Jul. 24, 1886." *Walter Deane correspondence*
