Southington March 3rd 1903

My Dear Mr Davenport

Yours of Feb 3rd at hand.

As I am writing for publication upon additions to the "Flora of Southington" I will refer to some of the specimen sent in the package to you. If you could return them at your earliest convenience it would be of great assistance to me,

I wish to express to you my appreciation of your kindness, my only regret is that I cannot repay you in some way. I think that we appreciate such favours more as we advance in years. You remind me of Dr Gray who as I have seen it related never refused to assist an inquiring botanist, and it should be so, we weaker, one of the rank and file

who are not situated where we can have
access to the larger Herbaria if we are
to good work must be assisted by
the leaders as our courage fails and
we give up in despair, I have been
at work now for several years building
up an herbarium of authenticated material
something that I can refer to with
confidence and I greatly appreciate
the additions made from year to
year.

It is with the greatest
pleasure that in referring to my collection
of ferns I can assure you how
attached I am to most of the species, it adds
so much to their value and the
confidence I have in them

Wishing that you may remain
with us for many years yet

I remain

Your sincerely
L. Lincoln
