

C  
TORREY BOTANICAL CLUB

COLUMBIA COLLEGE

49TH STREET AND FOURTH AVENUE

NEW YORK, March 30th 1886.

Geo. E. Araport,

Dear Sir:

Your very kind  
note of the 26th is received, as also the  
Fern notes, which are very interesting. I  
had hoped to have space for them in the  
April number, which has reached page  
proof and contains 20 pp and two plates,  
but the last proofs are just received and  
there remain but 15 lines, so that I shall  
have to hold them over till May. I will  
have it set up just as soon as the Apr.

number is out and will send you proof.  
I have written to J. Reardon for a set  
of his gems, between my own collection  
and that of Columbia College we shall not  
duplicate very much. Columbia does not  
possess a specimen of *Aucinia Mexicana*  
from the U.S. I have been putting  
the gems of the collection in order if  
I check them off on your exchange list  
would it be too much trouble to you to  
see if among your duplicates you have  
any of our desiderata. We will try and  
reciprocate if we have anything that you lack  
in the way of gems.

Very Truly  
E. S. Britton.

Britton, Elizabeth G. 1886. "Britton, Elizabeth G. Mar. 30, 1886." *George Edward Davenport correspondence*
