

H

New Haven. May 9. '78

Geo. E. Davenport. Esq.

Dear Sir.

I had not noticed that  
Plate XIII was marked  
Asplenium - before -

The R. Br. is wrong too.

I have had nothing to  
do with the names on  
the plates hitherto, but  
will try to get the  
control of it hereafter.

I enclose some of  
Miss Burbeck's Fern.

Mr. Baker thinks it is  
new. I think it is only  
starved N. candida.

Cleveland can get more  
of it for you - He calls  
it candida.

A good many ferns are  
sometimes colored & sometimes  
not. Aspl. Filix-foemina  
for instance.

Yours very truly

J. V. Eaton
