

14
Daniel C. Eaton,

NEW HAVEN, CONNECTICUT.

Sept. 17. 1878.

My dear Mr Davenport.

Yes - it is *Ceratopteris*
thalictroides - If Dr Garber
sends you it I will share
with you.

Prof. L. R. Gibbes wrote
me last month about
the Charleston Pteris, & I
have asked for specimens
& think he will send them.

I will be glad to see
your paper on *Aspl. spinulosum*.

The fern you sent me was
Cyrtopteris fragilis - I return

for you to look at again.

My *Ad. tricholepis*, Fée. is
all glued down - I have
only one found from the U.S.
one from prov. Huasteca in
Mexico, + a few from Yucatan.

I enclose three pin rules ~~which~~
which ~~what~~ will show the
hairy surfaces + involucres.

I enclose a short
account of it which
gives references. &c.

Yours very truly

J. C. Eaton.

Eaton, Daniel Cady. 1878. "Eaton, Daniel C. Sept. 17, 1878." *George Edward Davenport correspondence*
