

H

New Haven. Feb. 7. 1882

My dear Mr Davenport.

The doings of Marcus  
E. Jones & the rest of them  
do not trouble me at all,  
& I beg you not to give  
yourself any concern about  
them.

I have not seen the  
February Bulletin.

Rusby has sent me his  
Woodvras all mixed up.

I find among them what  
I think is *W. Mexicana*, with  
a very evident lacinate-  
tinged indusium - *W. Oregon*,  
with almost no indusium, &  
*W. Plummerae*, which seems  
to me only a very glandular

form of *W. obtusa*. But I  
have no doubt he has sent  
one thing to one person & another  
thing to another.

I have seen no such  
statement about prothallus  
as you speak of.

I expect to be in Cambridge  
tomorrow evening, & to stop  
a few days with Prof. Gray,  
& hope I may see you.

Yours very truly

Samuel J. Eaton.

Eaton, Daniel Cady. 1882. "Eaton, Daniel C. Feb. 7, 1882." *George Edward Davenport correspondence*
