

Illustrations. I hope he will not give any miniature portraits.

I think my plan of giving one part full size is much better than giving a reduced figure.

I mentioned this to Prof Eaton once, but the very next number contained the Almonds.

I will be glad to hear from you at any time.

By the way I notice you have mentioned in your catalogue that you propose setting out "Terms of New England".

Remember me kindly & your family.

Yours Sincere

Friend

H. W. Willman

Linsdale, Pa —

My Dear Mr. Darvill

Yan Postal had received a few days ago informing me of your family troubles. I sympathize with you very much. I earnestly hope the health (one of the greatest blessings) will soon be restored to you and all your family, calling at the Post Office this morning I received your letter, and it concluded to answer it at once because my correspondence accumulates & I might leave it off too long. I am very busy with my Etchings. I will send you a number of the plates in a few days for your criticism. I am not getting on as fast as I would like. having a good deal of bad luck with my plates, and accid., it is very troublesome when you

have worked several nights on a plat
and have to do it all over again. First
because some little thing went wrong
in the manuscript. The temperature
is likely to be more regular now, & I
think I will be more fortunate.

If not too much trouble will you send
me a good characteristic specimen of
Cryptogramma acrostichoides PBr

I believe I have every thing else,
Mr. Scott sent me a nice lot of
specimens from Canada,

I am going through your Catalogue
and will arrange them in the
same manner. I want you to
straighten me up on the Aspidiums
but no hurry yet.

I have not had time to write a
notice of your Catalogue yet
but will do so. My friends here
who subscribe to it are well
pleased. Prof. L. Berger is now

making a thorough search for
Ebeniodes. I ought to find it.—
You ought to send one of your Catalogues
of the New York Nation. I was astonished
to find the number of enquires
after the Etetomy from the notice
this paper gave me.

Scribner, and
Dodd Mead & Co., all sent for
specimen apes. It is just possible
I may sell more than I expect.
People do not care about subscribing
to any work (especially high price)
until they see it. I do not blame them.
I have enough to justify me to you.
You say you intend receiving my
Catalogue from a different
stand-point from any you have
seen. I am at a loss to understand
but I can afford to wait until you
are ready. I am beginning to be
anxious to see Mr. Hason's form

Williamson, John. 1872. "Williamson, John undated." *George Edward Davenport correspondence*
