

My Dear Davenport

I send you one or two bunches
of *S. spinulosum*. I collected this
at the place where I got
the other plants last season. They
seem to be spreading. I have examined
a few bunches & I find them the
typical *S. spinulosum*. I certainly
think you have made a good
point especially on the inclusion
and to one who watches carefully
the texture seems different from
the variety. I am looking for
your long promised letter.

but I suppose you have always
plenty to do. I have not been
away anywhere this season. must
stick to business write soon -

Yours sincere friend

John Williamson

Williamson, John. 1872. "Williamson, John undated [6th item]." *George Edward Davenport correspondence*
