

63 Market Street,

My Dear Mr Davenport,

I have just mailed

you 24 more of my plates.

Some of them are not as well  
printed as I would like. I will  
see that they make them a little  
stronger. Pl. 47. is rather weak

You see they have two 38.

one should be 39. *C. bulbifera*.

I think this a good plate.

60 your vernation is turned upside  
down. Fig 7 & 10 are rather close.

in Plate 40. do you think I ought  
to separate the reticulated pinnae  
from the rest of the plant.

Every thing is ready to go to press.

The next time I write I hope  
to send your copy. I must now

attend to the sale. I am afraid

I am not a good hand at that.

You know I own the copy right

of every thing about it. I want you

to do what you can for me. I have

worked hard at this. I may get up

another circular. I was told about

another popular fern book, being published

next month. What do you know about it.

I received the box with specimens. I will examine the plants & see that they are all right.
