

Louisville Ky

March 20 1848

Dear Mr Davenport

I send you two of  
The last etchings I have made.

The *C. vestita* was drawn partly from your plant  
and partly from a Specimen Mr Martindale sent  
me and from The form I had myself

I think I have a pretty characteristic  
illustration. I tried to show the hairy  
appearance. The *Dicksonia* etching is from  
a plant in my own collection. I thought best  
to give a piece of a frond full size

These are printed directly from my plate, and not  
transferred to stone like The (*Erethismus*)

My MSS is in The printers hands and progressing very  
nicely Yours Resps- John Williamson, I will not forget to send  
your specimens just as soon  
as I am done. J.W.

Williamson, John. 1878. "Williamson, John Mar 20, 1878." *George Edward Davenport correspondence*
