

I think Mr. Faxon makes as much  
out of this art as possible to make  
he has a boldness that Emmert too  
never dreamt off. I think Mr.  
Faxon would enjoy working with  
the etching needle, I hardly recognise  
the Woodsia hyperborea, is this a typical  
specimen. I have asked Mr. Watt to  
send me a good plant. I think the  
Woodsia hyperborea in Fern Etchings -  
one of the best in the book, it has a rich  
tone that ~~few~~ of the others have  
I seem to stand out better. Excepting  
personal criticism.

Your Sincere Friend  
John Williamson

Louisville 14

Oct 6 1874

My Dear Mr. Davenport.

Your P. O card

Received this morning. In regard to the  
A Lanthetis I think your friend is  
correct. as soon as I saw the first  
proof I noticed that object. I have  
not printed this plate yet, and  
may make the change, but I will  
consider this carefully first, otherwise I  
think the plate is good. There are  
quite a number of the plates I am  
not altogether satisfied with, and if  
I have not time to correct them for  
in 2<sup>d</sup> ed I certainly will do so  
some time or other. I have nearly finished  
Haplolevenus and C. multicauda  
The Acanthus I think will make a good

I will send you proof in a few days  
I have not yet heard from Ester &  
Lauret. perhaps I did not make  
them a <sup>very</sup> liberal offer. I offered them  
25 copies. 13 off. this is the best I will  
do. & to tell you the truth I do  
not care whether they accept it or  
not. I am very independent about  
this. I thank you for calling the attention  
of Mr Sturt to the book.

I am anxious to push the book  
my self but can't do anything until  
the notices are out. I have got Redfield's  
Shows me two - Do you think Mr John  
Robinson or Mr Faxon would endorse  
the book so as I could use it in  
Circular. The Notice notice has  
not appeared yet.

I am going up to Worcester to  
morrow and may make some  
arrangements with Robert Clarke  
& Co large Publishers.

Ester & Lauret had plenty of time to  
answer, but I am not going to  
make any bargain with any one except  
I get my own terms. Every person  
that has received that book is  
well pleased and they all think it  
is cheap for the amount of work  
put into it.

I had a box of plants sent from  
my Lynn friend yesterday. He send  
a ~~beautiful~~ <sup>living</sup> large specimen of Scleria  
I have pressed it & will send you  
& Prof Eaton a piece.

I may tell you however. That I think  
this individual plant has been growing  
on a greenhouse for some time,  
(He did not say so.) I have written  
for a few other specimens that were  
collected in the original locality.  
I have received Ester Term of Feb 11  
I like the plates very much
