

June 29

My Dear Davenport -

I send you a batch
of plates, tell me what you
think of them -

I am afraid I have got into some
troubles with the woodsi, hypobore
& woodsi glabella, I will
examine them carefully to-morrow.

Can you send me a description
of *C. alabamensis*, I can make one
but I prefer using a more experienced
botanist description than I am -

I am now busy over your, *Spermilum*
&c. I have found a new

locality for *A. cristatum*,
4 miles from Jonesville

I am very busy now
therefore you must excuse this
hurry note - Your friend
J. W.

Robinson, John. 1872. "Robinson, John Jun 29 [no year]." *George Edward Davenport correspondence*
