

1  
Mch - 1874

Thursday Am.

Dear Mr. Davenport -

Not seeing you  
while in Boston yesterday I  
now write to thank you again  
for the very valuable additions  
to my collection - One looking  
in *Milde* I find mention of  
a *Var* (of *B. simplex*) "*compositum*"  
which has a somewhat ternate  
character and as well as I  
can bother it out is our  
strange form - The *Wrightianus*  
is fine and it certainly looks

satisfaction also— where is Wally. I fear  
he must have received my pack-  
age several days ago —

Yrs truly  
John Ballman

John Ballman

more reasonable according  
to the specimens we have  
to call "*Brachypterus*" a  
row of that rather than the  
*Amithopus* but others know  
best I presume —

Mr Hubbard whom I met  
in B. yesterday said Eaton  
said he was ready to write  
whenever a publisher was ready  
to keep him out of loss —

I am again delighted to  
find my opinions correct  
on the *Bot. ternatum* and  
*phragmites* ~~to~~ I presume  
you have the same

Robinson, John. 1874. "Robinson, John Mar 1874." *George Edward Davenport correspondence* –.
