

H

Salun Dec 13.77.

A
Dear Mr Davenport,

I have just finished an
evening's work which I know you would have
been very much interested in — I send
the results such as they are — I do not
know what you wanted them to show or have
the advantage of working unbiased — The glands
are on both sides of the pond, & on the pond
are thus R, but on the etches thus the same R,
I think very likely on the etches they have
been broken off & were (some of them at
least) like those on the ~~etch~~ pond — The
spines, partake of the glandular nature
and are covered with curved hairs
some case scale as you will see
I worked with the $\frac{1}{2}$ in, $\frac{1}{4}$ in, & $\frac{1}{8}$ in.
obj. & with camera — all I drew
were fine razored sections —
It is late & must stop, Tell me

what you think of it —

In great haste

Truly

To

Mr. Cheilanthes Viscida, Davenport.

8 Pearl St

Boston
