

Salem Nov. 18. 48.

Dear Mr. Davenport.

I have been looking over a neglected letter from you and find a request for a red-stemmed filix-fem. I have none on hand but a plant in the garden from Essex Woods is now frozen up. I send herewith a copy of what I find in Mett. in his Lepidoptera book thinking you might like it. I shall look further when I have a chance —

Lulu JR

Asplenium Mchauxii Spreng. syst 4.88.

A. elatius Link fil. 94. *Aspidium angustum*
Willd. v. 277. non Swartz.

c. Folia apice, una cum segmentis primariis et secundariis, repetito-dichotoma.

Asplenium monstrosum H. Berol. Kunze Lin.

23. 305. Plak. alv. J. 284. Fig. 8.?

Anmerk. die normalen Blätter dieser Varietät sind von *A. filix-femina* nicht verschieden; die monströsen kehren alljährlich wieder und werden reichlicher als die normalen entwickelt. Beide fructifizieren

Europa et America borealis.

1856.

Filices Horti Botanici Lipsiensis = Dr. Geo. Mettenius.

57. *Asplenium filix-femina* Bernhardi. Koch syn 981. Sontkewitz
56. T. 58. 59.

Rhizoma obliquum; folia 2-2½' longa, membranacea,
glabra. elliptico-oblonga vel oblongo-lanceolata, acu-
minata, bifurcata; segmenta primaria e basi
latiore, linearis vel oblongo-lanceolata, acuminata;
segmenta secundaria basalia maxima, sensim de-
crescentia, ovata, oblonga vel oblongo-lanceolata,
acuminata vel obtusa, basi profundi pinnatifor-
tita, versus apicem pinnatifide incisa; laciniae
oblongae vel ovatae, obtusae vel acutae, dentatae,
antibus binis pluribus acutis. Laciniae in-
feriores nervum secundarum pinnatum, super-
iores furcatum excipientes. Sori in ramo
antico infimo, ad costam segmentorum se-
cundi ordinis seriatim; inferiores curvati,
cruci costali majore, costulari minore,
ramo aplazioidei, superiores recti; rami
superiores laciinarum steriles vel fertiles,

soros 1-3, ad costulam laciniarum se-
riatos, gerentes. Indusium membranaceum
tenuerum, margine libero fimbriato-^{facerum}
~~laciniam~~
Taf. XIII. 15. 16.

Athyrium filix-femina Roth. tent. III. 65. As-
pidium Su. Willd. V. 276.

Variat: a. Segmenta secundaria orato-oblonga
obtusa; laciniae oblongae,~~lanceolatae~~ obtusae,
dentatae; sori ad costam segmentorum secund
ordinis serati, omnes fine curvati; laciniae
praeter basales steriles.

Asplenium Athyrium Sprng. syst. IV. 88. *Aspid-*
ium asplenoides Presl.

b. Segmenta secundaria lanceolata, acuminata;
laciniae oblongo-lanceolatae, acutae, inciso-
dentatae, dentibus angustis acutis. Sori
ad costam segmentorum et laciniarum
seriati, plerique curvati

Robinson, John. 1878. "Robinson, John Nov 18, 1878." *George Edward Davenport correspondence* –.
