

K
JOHNS HOPKINS UNIVERSITY,
BALTIMORE.

August 1, 1896

Mr Geo E. Davenport,

My dear Sir,

The enclosed "Key" was printed in the University Circulars but none of the discredit ^{may} to be attached to the Johns Hopkins. The work was done in the summer of 1894 to pass away the time, and was printed as a contribution from the 'Naturalists' Field Club, and not as a botanical study. I say this because I realize its defects and shortcomings, and would not print it now if I had not done so before.

You need not reciprocate unless you wish to exchange ferns, or Pteridophyta in general, with me. As you have a copy

of the Lemnacean Check List I can
refer to the species by number.

My duplicates (not including the
commoner species) are

51, 68, 85, 86, 104, 102, 110, 131,
166, 180, 200 (var. *Bigelovii*) 212. All
from the Baltimore region.

Very truly yours

G. E. Waters.

Waters, Campbell Easter. 1896. "Waters, Campbell E. Aug 1, 1896." *George Edward Davenport correspondence* –.
