

K

BOTANIC GARDEN, CAMBRIDGE, MASS.

March 27

1874

My Dear Sir,

Dr. Gray is now in Georgia, having gone South for the benefit of his health, and will not return until the 1st May.

I have examined the specimens sent by you. The Runny is *R. Acetosa* - common in the meadows of Europe & elsewhere.

The oak is more questionable, though it has all the characters of the Chinquapin oak (*Q. prinoides*) with exception of its size as reported, and is rather that than the

var. *acuminata* of G. Prince.

I would like to retain this
for Dr. Gray's examination,
if you are not in haste
about the return of the
specimens.

Yours very truly

Chas. E. Lamphere }
Boston.

Miss Watson

Watson, Sereno. 1875. "Watson, Sereno Mar 27, 1875." *George Edward Davenport correspondence* –.
